Contents

Volume 22 Number 1

G. T. Yamaguchi and F. E. Zajac — 1 — **A planar model of the knee joint to characterize the knee extensor mechanism**

J. G. Hay and A. M. Thayer — 11 — **Flow visualization of competitive swimming techniques: the tufts method**

P. P. Purslow — 21 — **Strain-induced reorientation of an intramuscular connective tissue network: implications for passive muscle elasticity**

A. J. van den Bogert, H. C. Schamhardt and A. Crowe — 33 — **Simulation of quadrupedal locomotion using a rigid body model**

V. P. Stokes, C. Andersson and H. Forssberg — 43 — **Rotational and translational movement features of the pelvis and thorax during adult human locomotion**

K. B. Chandran, R. Schoephoerster and K. C. Dellsperger — 51 — **Effect of prosthetic mitral valve geometry and orientation of flow dynamics in a model human left ventricle**

V. Kippers and A. W. Parker — 67 — **Validation of single-segment and three-segment spinal models used to represent lumbar flexion**

Letters to the Editor

R. W. Mann — 77 — **Comment on 'Multi-channel strain-gauged telemetry for orthopaedic implants'**

G. Bergmann — 77 — **Author's response**

Book Review

Timothy W. Wright — 79 — ***Definitions in Biomaterials*, by D. F. Williams (Ed.)**

Volume 22 Number 2

T. E. Fairley and M. J. Griffin — 81 — **The apparent mass of the seated human body: vertical vibration**

J. L. Kuhn, S. A. Goldstein, M. J. Ciarelli and L. S. Matthews — 95 — **The limitations of canine trabecular bone as a model for human: a biomechanical study**

N. Iida — 109 **Physical properties of resistance vessel wall in peripheral blood flow regulation—I. Mathematical model**

N. Iida and Y. Mitamura — 119 **Role of physical properties of resistance vessel wall in regulating peripheral blood flow—II. Structural and mechanical behavior**

D. M. Nunamaker, D. M. Butterweck and M. T. Provost — 129 **Some geometric properties of the third metacarpal bone: a comparison between the thoroughbred and standardbred racehorse**

N. Yoganandan, G. Ray, F. A. Pintar, J. B. Myklebust and A. Sances, Jr — 135 **Stiffness and strain energy criteria to evaluate the threshold of injury to an intervertebral joint**

J. Apkarian, S. Naumann and B. Cairns — 143 **A three-dimensional kinematic and dynamic model of the lower limb**

N. Sasaki, N. Matsushima, T. Ikawa, H. Yamamura and A. Fukuda — 157 **Orientation of bone mineral and its role in the anisotropic mechanical properties of bone—transverse anisotropy**

Technical Notes

D. W. Hahs and R. N. Stiles — 165 **Buckle muscle tension transducer: what does it measure?**

R. A. DiCaprio and J. J. Thomason — 167 **An inexpensive strain gage amplifier and signal conditioner for biological applications**

V. E. Modest, M. C. Murphy and R. W. Mann — 171 **Optical verification of a technique for *in situ* ultrasonic measurement of articular cartilage thickness**

R. C. M. B. Meijer, R. Huiskes and J. M. G. Kauer — 177 **A stereophotogrammetric method for measurements of ligament structure**

Book Review

R. Brand and L. Claes — 185 ***The Law of Bone Remodelling*, by J. Wolff**

Volume 22 Number 3

E. P. Salathe, Jr, G. A. Arangio and E. P. Salathe — 189 **An application of beam theory to determine the stress and deformation of long bones**

P. N. Shivakumar, Chi-Sing Man and S. W. Rabkin — 201 **Modelling of the heart and pericardium at end-diastole**

H. A. Hogan and M. Henriksen 211 **An evaluation of a micropolar model for blood flow through an idealized stenosis**

R. E. Seroussi, D. G. Wilder and M. H. Pope 219 **Trunk muscle electromyography and whole body vibration**

D. R. Carter, T. E. Orr and D. P. Fyhrie 231 **Relationships between loading history and femoral cancellous bone architecture**

C. D. Mote, Jr and C. Y. Kuo 245 **Identification of knee joint models for varus–valgus and internal–external rotations: snow skiing experiments**

T. Arts and R. S. Reneman 261 **Dynamics of left ventricular wall and mitral valve mechanics—a model study**

J. E. Wood, S. G. Meek and S. C. Jacobsen 273 **Quantitation of human shoulder anatomy for prosthetic arm control—I. Surface modelling**

Announcements 293 **International Symposium on Motor Learning and Movement Behavior: Motor Learning and Training of Sport Skills**

7th Congress of the European Society of Biomechanics

Volume 22 Number 4

Z. Ladin, W. C. Flowers and W. Messner 295 **A quantitative comparison of a position measurement system and accelerometry**

J. E. Wood, S. G. Meek and S. C. Jacobsen 309 **Quantitation of human shoulder anatomy for prosthetic arm control—II. Anatomy matrices**

D. E. Thompson and D. J. Giurintano 327 **A kinematic model of the flexor tendons of the hand**

Y. I. Cho and L. H. Back 335 ***In vitro* flow measurements in ion sputtered hydrocephalus shunts**

M. A. Srinivasan 343 **Surface deflection of primate fingertip under line load**

S. D. Ryan and J. L. Williams 351 **Tensile testing of rodlike trabeculae excised from bovine femoral bone**

A. Shirazi-Adl 357 **On the fibre composite material models of disc annulus—comparison of predicted stresses**

BM 22:11-12-B

P. E. Martin, M. Mungiole, M. W. Marzke and J. M. Longhill — 367 — **The use of magnetic resonance imaging for measuring segment inertial properties**

J. D. Humphrey and F. C. P. Yin — 377 — **Biomechanical experiments on excised myocardium: theoretical considerations**

Technical Note

P. C. Galbraith and J. T. Bryant — 385 — **Effects of grid dimensions on finite element models of an articular surface**

Letter to the Editor

R. A. Brand — 395 — **Comment on 'The passive elastic moment at the hip' by Yoon and Mansour**

J. M. Mansour — 395 — **Author's response**

Book Review

R. S. Lakes — 397 — ***Cellular Solids*, by L. J. Gibson and M. F. Ashby**

Books Received — 399

Announcement — 401 — **The Human Spine: A Surgical–Engineering Interface**

Volume 22 Number 5

D. C. Viano, A. I. King, J. W. Melvin and K. Weber — 403 — **Injury biomechanics research: an essential element in the prevention of trauma**

R. B. Martin and J. Ishida — 419 — **The relative effects of collagen fiber orientation, porosity, density, and mineralization on bone strength**

G. Jayaraman, H. M. Zbib and R. R. Jacobs — 427 — **Biomechanical analyses of surgical correction techniques in idiopathic scoliosis: significance of bi-planar characteristics of scoliotic spines**

F. J. Bejjani and N. Halpern — 439 — **Postural kinematics of trumpet playing**

J. W. Ashe, A. E. Marble, D. N. Swingler, R. W. Landymore and C. E. Kinley — 447 — **The measurement of afterload, vascular input impedance, and power distribution in aorto-femoral bypass**

G. S. Throckmorton — 455 — **Sensitivity of temporomandibular joint force calculations to errors in muscle force measurements**

J. D. Currey 469 **Strain rate dependence of the mechanical properties of reindeer antler and the cumulative damage model of bone fracture**

J. B. A. M. Horsten, A. A. Van Steenhoven and M. E. H. Van Dongen 477 **Linear propagation of pulsatile waves in viscoelastic tubes**

F. Linde and I. Hvid 485 **The effect of constraint on the mechanical behaviour of trabecular bone specimens**

M. Klanchar and J. M. Tarbell 491 **Pressure drop and flow rate measurements in a human aortic bifurcation cast for steady and pulsatile flow**

Announcements 501 **5th Annual East Coast Clinical Gait Laboratories Conference, Helen Hayes Hospital, 2–3 November 1989**

Multidisciplinary Symposium on New Techniques and Technology in the Treatment of Occlusive Vascular Disease

Volume 22 Number 6/7

S. C. Cowin and M. M. Mehrabadi 503 **Identification of the elastic symmetry of bone and other materials**

N. Petrov, S. Pollack and R. Blagoeva 517 **A discrete model for streaming potentials in a single osteon**

S. Niku and J. M. Henderson 523 **Viscosity of the flexor muscles of the elbow joint under maximum contraction condition**

R. K. Jensen 529 **Changes in segment inertia proportions between 4 and 20 years**

Maw-Chang Lee and R. C. Haut 537 **Insensitivity of tensile failure properties of human bridging veins to strain rate: implications in biomechanics of subdural hematoma**

D. J. DiAngelo, D. A. Winter, D. N. Ghista and W. R. Newcombe 543 **Performance assessment of the Terry Fox jogging prosthesis for above-knee amputees**

S. A. Ben-Haim and G. M. Saidel 559 **Chest wall mechanics: effects of acute and chronic lung disease**

J. Dapena and M. E. Feltner	565	**Influence of the direction of the cable force and of the radius of the hammer path on speed fluctuations during hammer throwing**
F. F. Mark, C. B. Bargeron, O. J. Deters and M. H. Friedman	577	**Variations in geometry and shear rate distribution in casts of human aortic bifurcations**
M. Hubbard and L. W. Alaways	583	**Rapid and accurate estimation of release conditions in the javelin throw**
D. D. Hanle, E. C. Harrison, A. P. Yoganathan, D. T. Allen and W. H. Corcoran	597	***In vitro* flow dynamics of four prosthetic aortic valves: a comparative analysis**
S. M. Maxwell and M. L. Hull	609	**Measurement of strength and loading variables on the knee during alpine skiing**
W. E. Caler and D. R. Carter	625	**Bone creep–fatigue damage accumulation**
M. G. Faulkner, P. Fuchshuber, D. Haberstock and A. Mioduchowski	637	**A parametric study of the force/moment systems produced by T-loop retraction springs**
D. R. Sumner, C. L. Olson, P. M. Freeman, J. J. Lobick and T. P. Andriacchi	649	**Computed tomographic measurement of cortical bone geometry**
I. Vesely and D. Boughner	655	**Analysis of the bending behaviour of porcine xenograft leaflets and of natural aortic valve material: bending stiffness, neutral axis and shear measurements**
J. L. Williams and W. J. H. Johnson	673	**Elastic constants of composites formed from PMMA bone cement and anisotropic bovine tibial cancellous bone**
M. R. Yeadon and M. Morlock	683	**The appropriate use of regression equations for the estimation of segmental inertia parameters**
S. D. Balar, T. R. Rogge and D. F. Young	691	**Computer simulation of blood flow in the human arm**
T. S. Gross and R. P. Bunch	699	**Discrete normal plantar stress variations with running speed**
R. Schoephoerster and K. B. Chandran	705	**Effect of systolic flow rate on the prediction of effective prosthetic valve orifice area**

M. G. Pandy and N. Berme 717 **Quantitative assessment of gait determinants during single stance via a three-dimensional model—Part 1. Normal gait**

M. G. Pandy and N. Berme 725 **Quantitative assessment of gait determinants during single stance via a three-dimensional model—Part 2. Pathological gait**

E. Schneider, J. Eulenberger, W. Steiner, D. Wyder, R. J. Friedman and S. M. Perren 735 **Experimental method for the *in vitro* testing of the initial stability of cementless hip prostheses**

Technical Notes

G. V. B. Cochran, D. G. Dell, V. R. Palmieri, M. W. Johnson, M. W. Otter and M. P. Kadaba 745 **An improved design of electrodes for measurement of streaming potentials on wet bone *in vitro* and *in vivo***

J. A. Gilbert, M. C. Skrzynski and G. E. Lester 751 **Cross-sectional moment of inertia of the distal radius from absorptiometric data**

P. D. Stein, H. N. Sabbah and M. Flynn 755 **Very high speed (2,000 frames s^{-1}) cine angiography for evaluation of instantaneous left ventricular function**

Book Review

C. T. Rubin 761 ***Axis and Circumference—The Cylindrical Shape of Plants and Animals*, by S. A. Wainwright**

Books Received 763

Announcements 765

Volume 22 Number 8/9

B. Clément, G. Drouin, G. Shorrock and P. Gely 767 **Statistical analysis of knee ligament lengths**

M. Ries, J. Pugh, Jan Choy Au, J. Gurtowski and R. Dee 775 **Cortical pelvic strains with varying size hemiarthroplasty *in vitro***

P. Grigg and A. H. Hoffman 781 **Calibrating joint capsule mechanoreceptors as *in vivo* soft tissue load cells**

A. H. Hoffman and P. Grigg 787 **Measurement of joint capsule tissue loading in the cat knee using calibrated mechanoreceptors**

R. Huiskes and R. Boeklagen 793 **Mathematical shape optimization of hip prosthesis design**

K. Schneider, R. F. Zernicke, R. A. Schmidt and T. J. Hart — 805 **Changes in limb dynamics during the practice of rapid arm movements**

P. J. Reuderink, H. W. Hoogstraten, P. Sipkema, B. Hillen and N. Westerhof — 819 **Linear and nonlinear one-dimensional models of pulse wave transmission at high Womersley numbers**

A. Odgaard, I. Hvid and F. Linde — 829 **Compressive axial strain distributions in cancellous bone specimens**

I. Hvid, S. M. Bentzen, F. Linde, L. Mosekilde and B. Pongsoipetch — 837 **X-ray quantitative computed tomography: the relations to physical properties of proximal tibial trabecular bone specimens**

A. Simkin, I. Leichter, A. Swissa and S. Samueloff — 845 **The effect of swimming activity on bone architecture in growing rats**

V. C. Mow, M. C. Gibbs, W. M. Lai, W. B. Zhu and K. A. Athanasiou — 853 **Biphasic indentation of articular cartilage—II. A numerical algorithm and an experimental study**

J. C. Behiri and W. Bonfield — 863 **Orientation dependence of the fracture mechanics of cortical bone**

C. W. Spoor, J. L. van Leeuwen, F. H. J. de Windt and A. Huson — 873 **A model study of muscle forces and joint-force direction in normal and dysplastic neonatal hips**

S. C. White, H. J. Yack and D. A. Winter — 885 **A three-dimensional musculoskeletal model for gait analysis. Anatomical variability estimates**

R. B. Ashman, J. Y. Rho and C. H. Turner — 895 **Anatomical variation of orthotropic elastic moduli of the proximal human tibia**

N. L. Fazzalari, D. J. Crisp and B. Vernon-Roberts — 901 **Mathematical modelling of trabecular bone structure: the evaluation of analytical and quantified surface to volume relationships in the femoral head and iliac crest**

J. H. Koolstra, T. M. G. J. van Eijden and W. A. Weijs — 911 **An iterative procedure to estimate muscle lines of action *in vivo***

M. K. Kwan, R. D. Coutts, S. L.-Y. Woo and F. P. Field — 921 **Morphological and biomechanical evaluations of neocartilage from the repair of full-thickness articular cartilage defects using rib perichondrium autografts: a long-term study**

A. A. El-Bohy, King-Hay Yang and A. I. King — 931 **Experimental verification of facet load transmission by direct measurement of facet lamina contact pressure**

K. R. Kaufman, Kai-Nan An and E. Y. S. Chao — 943 **Incorporation of muscle architecture into the muscle length–tension relationship**

Technical Notes

M. L. Jimenez, T. D. Brown and R. A. Brand — 949 **The effects of grip proximity on perceived local *in vitro* tendon strain**

E. J. C. Ottevanger, C. W. Spoor, J. L. van Leeuwen, A. A. H. J. Sauren, J. D. Janssen and A. Huson — 957 **An experimental setup for the measurement of forces on a human cadaveric foot during inversion**

B. T. Bates — 963 **Comment on 'The influence of running velocity and midsole hardness on external impact forces in heel–toe running'**

G. Smith — 967 **Padding point extrapolation techniques for the Butterworth digital filter**

Letters to the Editor

R. S. Lakes — 973 **Comment on 'Some viscoplastic characteristics of bovine and human cortical bone'**

M. Fondrk, E. Bahniuk, D. T. Davy and C. Michaels — 973 **Authors' response**

Books Received — 975

Announcements — 977

Volume 22 Number 10

ABSTRACTS OF THE XII CONGRESS, INTERNATIONAL SOCIETY OF BIOMECHANICS

Abstracts — 979 **XII Congress, International Society of Biomechanics**

Announcement — 1113 **European Society of Biomechanics Award**

Author Index to Abstracts — i

Volume 22 Number 11/12

T. S. Keller and D. M. Spengler 1115 **Regulation of bone stress and strain in the immature and mature rat femur**

E. Toft, T. Sinkjaer, S. Kålund and G. T. Espersen 1129 **Biomechanical properties of the human ankle in relation to passive stretch**

T. Sinkjaer and R. Hayashi 1133 **Regulation of wrist stiffness by the stretch reflex**

G. A. Johnson, Tin-Kan Hung, A. M. Brant and H. S. Borovetz 1141 **Experimental determination of wall shear rate in canine carotid arteries perfused *in vitro***

H. Gonzalez and M. L. Hull 1151 **Multivariable optimization of cycling biomechanics**

D. A. Hoeltzel, M. J. Walt, R. F. Kyle and F. D. Simon 1163 **The effects of femoral head size on the deformation of ultrahigh molecular weight polyethylene acetabular cups**

F. Selker and D. R. Carter 1175 **Scaling of long bone fracture strength with animal mass**

R. F. Carey and B. A. Herman 1185 **The effects of a glycerin-based blood analog on the testing of bioprosthetic heart valves**

J. K. B. Krijger, B. Hillen and H. W. Hoogstraten 1193 **Mathematical models of the flow in the basilar artery**

M. Maes, V. J. Vanhuyse, W. F. Decraemer and E. R. Raman 1203 **A thermodynamically consistent constitutive equation for the elastic force–length relation of soft biological materials**

G. J. C. Ettema and P. A. Huijing 1209 **Properties of the tendinous structures and series elastic component of EDL muscle–tendon complex of the rat**

R. Blickhan 1217 **The spring–mass model for running and hopping**

J. R. Essinger, P. F. Leyvraz, J. H. Heegard and D. D. Robertson 1229 **A mathematical model for the evaluation of the behaviour during flexion of condylar-type knee prostheses**

C. Milgrom, M. Giladi, A. Simkin, N. Rand, R. Kedem, H. Kashtan, M. Stein and M. Gomori 1243 **The area moment of inertia of the tibia: a risk factor for stress fractures**

K. N. An, K. R. Kaufman and E. Y. S. Chao — 1249 **Physiological considerations of muscle force through the elbow joint**

Ho Nam Chang, Ji Soo Ha, Joong Kon Park, In Ho Kim and Hyun Dong Shin — 1257 **Velocity field of pulsatile flow in a porous tube**

P. Morgan and K. H. Parker — 1263 **A mathematical model of flow through a collapsible tube—I. Model and steady flow results**

Technical Notes

B. P. Sangeorzan, R. P. Judd and B. J. Sangeorzan — 1271 **Mathematical analysis of single-cut osteotomy for complex long bone deformity**

Yong San Yoon, Gun Hee Jang and Young Yong Kim — 1279 **Shape optimal design of the stem of a cemented hip prosthesis to minimize stress concentration in the cement layer**

J. J. Parkkinen, M. J. Lammi, S. Karjalainen, J. Laakkonen, E. Hyvärinen, A. Tiihonen, H. J. Helminen and M. Tammi — 1285 **A mechanical apparatus with microprocessor controlled stress profile for cyclic compression of cultured articular cartilage explants**

H. Inaba and M. Arai — 1293 **A method for measuring contact pressures instantaneously in articular joints**

Letters to the Editor

J. P. Paul — 1297 **Comment on 'An application of beam theory to determine the stress and deformation of long bones'**

E. P. Salathe' Jr, G. A. Arangio and E. P. Salathe' — 1297 **Authors' response**

Book Reviews

W. G. Darling — 1299 ***Neuromechanical Basis of Kinesiology*, by R. M. Enoka**

T. D. Brown — 1300 ***Bone Mechanics*, by S. C. Cowin**

Announcements — 1301 **Twenty-second Midwestern Mechanics Conference**

1302 **1990 Gordon Research Conference on Bioengineering and Orthopaedic Science**

Volume Contents and Author Index to Volume 22 — i
